Who We Are

Stormwater Plans, LLC was formed in 2005 to support the rapidly growing construction activities in the greater Phoenix and surrounding areas. With this rapid growth rate and numerous projects, our company has quickly expanded to locations throughout the state of Arizona and successfully completed projects in Nevada, New Mexico, Pennsylvania, Idaho and California.

Our company was initially created to support the Storm Water Pollution

Prevention Plans (SWPPs) and Arizona Department of Environmental Quality (ADEQ) Construction General Permit. We have maintained a strong presence in the area and currently have certified Erosion Control Coordinators located on various Arizona Department of Transportation (ADOT) projects throughout the state of Arizona.

What We Do

- ◆ Consulting Services
- ◆ Construction Surveillance
- ◆ Site / Land Selection
- ◆ Real Estate Services (www.ifounditinaz.com)

Our Inspectors

A large part of what we do is to provide qualified inspectors on project sites, whether is it storm water or construction related.

Our construction inspection capabilities are a key benefit in responding to our clients. Our staff is experienced in the full range of inspection efforts associated with construction and materials in keeping compliant with plans and specifications.

Our inspectors at Stormwater Plans, LLC are many talented individuals that bring many unique backgrounds to the table.

Most of whom, have been involved in the construction industry

throughout their careers. We have three civil P.E.'s licensed in Arizona. All staff members carry three important certifications including 16-hr AGC Erosion Control Coordinator certification, ACI Field Testing certification, and ATTI Field Technician certification.
